Abstract :-

The Indian history is one of the most dynamic histories in the world. Since its year of independence, India has come a long way from a newly independent democracy to an emerging global power. 21st century that will go a mile stone down in Indian history and also shape its future. The Various factors that affect the common man and the need to make the country developed are discussed in this paper. The India economy, Technology, Political environment and other areas like development of Space Science , Smart Cities and future developments that will go in the long days to come in Indian history. The Author has done decent contribution in creating awareness in recent trends in Indian History which will be beneficial to the readers and stakeholders. In recent times, India has also built foreign relations with world powers such as the United States, European Union, Japan, and Russia. Another important factor that enhances India’s position as an emerging global entity is the strength of its armed forces. The Indian military is the world’s third largest defense force, today.

The growth prospect of the Indian economy looks positive because it has a large percentage of the young population. With the increase in online infrastructure and strong entrepreneurial talent, India will be a force to reckon with in the e-commerce market.

Keywords :- History, Trends , Economy , Space , Technology , Society , Party, Smart.

I. Introduction

History of India can be dated as far as 5300 years ago. Modern Indian History is considered the history 1850 onwards. A major part of Modern Indian History was occupied by the British Rule in India. The Constitution of India holds a unique place in the country’s history. This is because

it created a sovereign republic that is the modern state of India. The history of the Constitution offers some interesting insights into the state of affairs before Independence. It took persistent efforts for several years to draft and enact our Constitution.

Meaning of Government as a society, we have always have flourished when we lived together in communities. A country is nothing but one giant community, and like every community, it must be governed. Let us study about the main purpose and functions of the government. We will also see the three forms of government, democracy, autocracy and oligarchy. The Indian History plays a important role in shaping the mankind by keeping the peace in the area.

II. India's Economic Power

Today, India is recognized as one of the fastest growing economies in the world. This reflects in its current status as the world's sixth largest economy based on Gross Domestic Product.

The growth prospect of the Indian economy looks positive because it has a large percentage of the young population. Further, India also has the 2nd largest population of fluent speakers of English – the global language.

Famous Indian entrepreneurs have also played a key role in the economic development of India. Visionaries like Ratan Tata, Narayan Murthy, Dhirubhai Ambani have not only created jobs for the Indian youth but also put India in a position to compete in the World Market. This growth has fueled many foreign companies to invest in the Indian market.

III. Great Achievements of ISRO

The achievements of the Indian Space and Research Organization (ISRO) in the 21st century will go down in Indian history as the golden era of Indian science and technology. Among ISRO's biggest achievements in the 21st century is the launch of its first unmanned lunar probe 'Chandrayaan 1' in 2008. With this, India became one of six space organizations to have achieved this feat. 2013 saw the successful launch of the Mars Orbiter Mission (MOM), also called Mangalyaan. Mangalyaan's entry into the Martian orbit in 2014 made India the first country to complete a maiden Mars mission. In 2015, India joined countries like the US,

European Union, and Japan when ISRO launched its satellite-based air navigation system GAGAN. Two years later, India set a world record by successfully launching 104 satellites in a single mission. Out of the 104 satellites, 101 were foreign satellites. In the coming years, Indian history will boast of these accomplishments of ISRO.

IV. Internet and E-Commerce Technology Boom

Among the 3 billion internet users globally, India accounts for 277 million. This makes India the world's second biggest mass audience driven by new technology. These numbers are predicted to double by the end of 2020. Reports suggest that the Indian Internet Market, valued at \$11 billion in 2013, could rise to \$137 billion by 2020. A further push to India's internet boom comes from the 'Digital India' initiative launched by PM Narendra Modi in 2015. This initiative aims to connect rural parts of India with high-speed internet and improve digital literacy.

V. Indian Smart Cities

The Government of India's latest initiative – 'Smart City Mission' aims to develop 100 smart cities in India that are citizen-friendly and sustainable. This mission intends to harness technology to drive economic growth and improve peoples' quality of life. The economic and social growth in Indian cities attracts a lot of people from all parts of the country.

This has lead to overcrowding and strained infrastructure. This mission tries to leverage the existing technological tools to develop new smart cities that can become the cities of tomorrow.

These cities can also become centers of opportunity for people, further driving growth and economy in the country.

If the development of these smart cities is a success, it will be a new chapter in Indian history for the future generations.

VI. Education System and its Growth in India

India has one of the largest networks of higher education institutions in the world. However, there is still a lot of potential for further development in the education system. Moreover, the aim of the government to raise its current gross enrolment ratio to 30 per cent by 2020 will also boost the growth of the distance education in India.

India's higher education system is the third largest in the world, next to the United States and China. The main governing body at the tertiary level is the University Grants Commission, which enforces **its** standards, advises the government, **and** helps coordinate between the centre **and** the state.

VII. Conclusion

The Recent Trends in Indian History are very encouraging and are playing the major role in world history which helps the mankind to develop in all the related fields . The future the Indian people depends on the proper planning and policies of the Government and policy makers . The areas discussed above are limited to only various developments and will go in long run in the Indian history.
